mps-1

Personal audio system

MP3 Players

Laptops and PC's

Portable CD

Games Consoles

Multimedia Phones

Digital Radios

The MPS-1 Personal Audio System meets the needs of the growing number of people who store their music and video on computers and portable players like iPod. It can be used with all portable or desk-top media players and computers and with three inputs and remote control it forms a powerful multi-purpose playback system. It is also ideal as an accurate monitoring system for music created on computers.

The MPS-1 can be used with:

Apple iPods, MP3 players and other portable media devices

Laptops, PCs and Macs

Portable CD, MD and DVD players

Portable or home Games Consoles

Walkman and other media-player mobile phones

Portable or desk-top Digital Radios

All registered trade marks are recognised

The MPS-1 is a combination of two stylish polished-aluminium loudspeakers and a black aluminium-cased digital amplifier, complete with a durable aluminium Remote Control.

The stunning audio performance comes from carefully matching the output of the 25 + 25 Watt digital amplifier with the acoustic characteristics of the compact loudspeaker. These loudspeakers are fitted with two specially designed and manufactured 50mm drive units. The system is optimised to maximise bass extension and sound output, without the requirement for a sub-woofer.

Dimensions:

Speaker: H 162mm, W 75mm, D 185mm

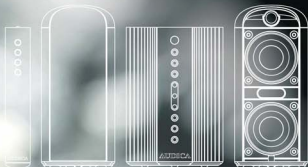

Amplifier: H 139mm, W 98mm, D 175mm

Input 1 0.5V at 1kHz, 15kOhm Impedance

Input 2 and 3 1.0V at 1kHz, 30kOhm Impedance

Amplifier power 25W + 25W RMS

Frequency range 70-20,000 Hz

The beautiful design and high quality materials used in the MPS-1 are in keeping with the most stylish contemporary devices and interiors while not looking out of place in more traditional décor. The MPS-1 has multiple applications throughout the home and office.

The MPS-1 is fitted with 2 x 1.5m Loudspeaker Cables.
A pair of 5m Loudspeaker Extension Cables are available as an optional accessory.

Also available is a matching iPod Stand which supports all models of iPod, while connected to the MPS-1.
